CAREER OBJECTIVE

Enthusiastic and dedicated individual with a strong interest in learning and growing. Focused on building practical skills and gaining valuable experience through teamwork and engaging projects.

EDUCATION

Higher Secondary Certificate (HSC) *2017 - 2019*
Holy Cross College, Tejgaon, Dhaka
Bachelor of Computer Science and Engineering (B.Sc.)
2020 - Present
Khulna University of Engineering & Technology (KUET),
Khulna-9203, Bangladesh.

TECHNICAL SKILLS

Programming Languages: C (Expert), C++ (Expert),
Java (Intermediate),
Python (Intermediate),
Swift (Intermediate)
Database: MySQL, Oracle, Firebase
Framework: Laravel, Android, Apache
Misc: GIT, HTML, CSS, OpenGL,
JavaScript, iOS, LaTeX,
Blender

PROBLEM SOLVING EXPERIENCES

- [Codeforces](#) 140+ Solved
- Others 100+ Solved

LANGUAGES

- Bangla
- English

ACHIEVEMENTS & AWARDS

- [Python Programming, Coursera](#) *2020*

EXTRA-CURRICULAR ACTIVITIES

Vice President (Dhrupodi- Dancers' Association),
KUET, 01/2024 - Present
Event Organizer(BitFest 2025 - KUET CSE National
Fest), 01/2025
General Member (Team Kilo Flight), KUET, 01/2023
- Present

MAJOR PROJECTS

[Animal-Foster-website](#)

Technologies: Laravel Framework, PHP, Microsoft SQL Server, CSS, JavaScript

A dynamic adoption-related website that offers user navigation, authentication, cart, adoption, abuse report, a bunch of admin activities, and adoption order tracking.

[EyeCanC](#)

Technologies: Python, Django, HTML, CSS, ML

A website that can detect if any person's eyes are closed or open in real-time and alert user about drowsiness.

[Animal-Foster-Java Application](#)

Technologies: Java, Netbeans

A java application that works as a adoption center, user can login, register, add items to cart, report abuse. Admin panel can edit items, check adoptee list and reports.

[QR-BAR-detector-scanner](#)

Technologies: Python

An image detection project that can identify QRcode and Barcode from image and give information about the code based on dataset.

[HEMAA-hotel-management-IOS-project](#)

Technologies: Swift, UIKit, RAPID API, Firebase, Xcode

The HEMAA app successfully integrates secure authentication, hotel data fetching, and an intuitive booking process, ensuring a smooth user experience.

[Arduino Car-Soccer Simulator](#)

Technologies: Arduino uno, Bluetooth module, Sensors, C++

Two arduino cars which can play soccer and goal into goal-post. Using bluetooth control, the car can move to every side. Detect goal and goal counting through sensors.

[CardiacRecorder](#)

Technologies: Android Studio, Java

An android app which can store blood pressure and heart rate data of users.

[Anima-Foster-Database\(SQL\)](#)

Technologies: SQL, PL-SQL

A complex database model that includes relationship between different entities for adoption center.

[Math Chase](#)

Technologies: Python, PyGame

A two player game where two series of numbers are given and player needs to max its score by choosing correct numbers.

[Living Room - Graphics](#)

Technologies: OpenGL

A simple living room with movement and lighting features.

[Compiler Project](#)

Technologies: Flex, Bison

A simple compiler for a programming language with different features.
